

## Welcome to our Skyridge Doodles family!

Congratulations on your deposit on your soon to be newest furry family member! We appreciate the great home you will soon give to one of our adorable puppies. We consider a deposit a firm commitment on making our puppy a part of your family! Deposits are nonrefundable. We are excited for you to meet them soon! We do our best to make the transition from our home to your home as smooth and comfortable for both you and the puppy when they come home to you. Here is what you can expect from our end!

1. We will update pictures of the puppies at 2 weeks, 4 weeks and 6 weeks along with videos and facetime occasionally. We want you to be a part of the growing process and see your babies grow and change! We encourage visits to our home when possible to start bonding with your puppy after they are 3 weeks old.
2. We will not ship puppies solo on flights. We highly encourage you to fly into Utah to pick up your baby. We are happy to meet you at the airport with your puppy. We are close to Salt Lake City International airport and also Provo airport. We recommend bringing a collar and leash for your new puppy when picking him or her up.
3. We do offer a nanny puppy service for a fee of \$1500 or you are welcome to find your own nanny transport service. We will not allow any type of outside ground transport unless it is of course you driving to our home which is very welcomed! We love meeting our families that take our puppies to be a part of their family!
4. Your puppy will go to the vet for a thorough 12 point inspection for a final check up just a couple days before coming home to you. If there are any reported health concerns from our vet, you would be contacted. At this point, if you are not 100% satisfied with the health report, we would refund your payment.
5. Your puppy will come to you eating Purina One Smart Blend Healthy Puppy formula. We recommend keeping your puppy on the same food as they transition into their new home and environment and then slowly integrate your choice of food slowly over a period of a week so they don't get tummy issues or diarrhea. We strongly recommend puppy kibble for the first year of life.
6. We recommend keeping them on a feeding schedule of three feedings daily until 14 - 15 weeks. Scheduled feedings will help make potty training much easier. When taking your puppy out to go potty, use simple commands such as "Go Potty" and reward immediately when they eliminate. Cheerios are a great potty reward!
7. We suggest supervised play when potty training. When your puppy is not being supervised,

they should be contained and taught boundaries. Do not let them roam your entire house freely when potty training! Be consistent in using the same door and area in the yard when you take them out to go potty.

8. Remember whatever you start the first night will be the expected norm from your puppy. They may cry a night or two but that ends quickly and they adjust quickly to their new family and environment. We highly recommend the Smart pet love snuggle puppy toy on Amazon to help your puppy transition into their new home.
9. Your puppy is a commitment for many years. We highly recommend investing in some good training with your new puppy. We encourage you to start watching youtube training videos before even bringing your puppy home. Zak George is a great online trainer! We recommend checking with your vet and finding a good local dog trainer as well to help you get your new puppy off to a great start with some great puppy training.
10. Your puppy will come to you current on all shots and wormings up to 8 weeks. A health schedule and health record will come with your puppy along with a vet health certificate. Puppies are not fully immunized until 16 weeks and we encourage you to not go to dog parks or other places with a lot of dogs until your puppy is fully immunized at 16 weeks for health reasons but still strongly encourage socialization among your friends and family..
11. We will send a packet of paperwork with your puppy when they come home that will include: Health guarantee/contract, vet health certificate, health record and health schedule. Puppies will also come with a start of food, puppy treats, blanket with a litter scent and a chewy familiar toy.
12. Again, we thank you for choosing a Skyridge Doodle puppy to become a part of your family! We stand behind the health of every puppy we place. We love your puppy and have done our very best to give them a great start both physically and socially and trust you will continue to love, raise, and train them the best you can. We offer lifetime support!

Thank you!
