Our veterinarian has recommended the following vaccinations and medications for our particular breed of dogs as follows:

- **2 weeks of age:** Pyrantel wormer 1 cc per 10 lbs.
- **4 weeks of age:** Pyrantel wormer 1 cc per 10 lbs.
Baycox 1 cc per 10 lbs.
- **5 weeks of age:** Panacure C (1 gram per 10 lbs. once a day for 3 days)
- **6 weeks of age:** Nobivac Canine 1 - DAPPv (first puppy shot)
Baycox 1 cc per 10 lbs. Pyrantel wormer 1 cc per 10 lbs.
- **7 weeks of age:** Baycox 1 cc per 10 lbs.
Pyrantel wormer 1cc per 10 lbs.
- **8 weeks of age:** Nobivac Canine 1 - DAPPv (second puppy shot)

Puppy will come home to you at 8 weeks. You may worm as your veterinarian suggests. Here are our suggestions for boosters and worming:

- **12 weeks of age:** Vanguard +5 (third puppy shot)
Panacur C - 3 days in a row (Grams determined upon puppy weight)
Microchip at 12 weeks
- **16 weeks of age:** Vanguard +5 (fourth puppy shot)
Panacur C - 3 days in a row (1 gram per 10 pounds once a day for 3 days)
Spay or neuter at 16 weeks
- **6 months of age:** Heartworm preventative (dosage and frequency to be administered as per your veterinarian's instructions for your area)
Rabies vaccine at 6 months
- **1 year of age:** Booster of Vanguard +5 (annual)
This vaccination may be different according to your area
